Situation Report # 008

Hot Topic

Why are reporting numbers different?

In order for DPH to report a COVID-19 case or death, the case must be confirmed by the department through testing or postmortem examination. It is a necessary step in ensuring that the information released is accurate. The biggest current lag in reporting is providers receiving results and reporting them to the state, as the state does not directly receive many of the test results. Any private provider who orders a test receives the results and then must report them to the Department of Public Health since COVID-19 is now a reportable disease.

Quarantine vs Isolation

While you may have heard these terms used interchangeably, they mean very different things. Quarantine is what happens when a person is not sick, who has **NOT** tested positive for the virus, separates him/herself by staying home or sheltering in place.

When a person has tested positive for COVID-19, whether they are well or sick, but do not need to be hospitalized, is placed in isolation, or should isolate from other household members and not go out into the public for any reason.

Calling 911

In this era of COVID-19 pandemic, our Emergency Response Services, police, fire, and paramedic are having to respond to non emergencies. **Do Not** call 911 if you do not have a critical emergency. **Businesses or individuals not adhering to social distancing nor shelter in place orders is NOT a critical emergency.**

Some examples of critical emergency are:

- Heart Attacks
- Car Accidents
- Seizures
- Crimes
- Shootings
- Break-ins
- Strokes
- Fires
- Drownings
