Number in red indicates increase in cases

Changes in RED

Cumulative Cases

	Positives	Fatalities
Georgia	23,773	942
U.S.	972,969	55,118
World	3,002,303	208,131

COVID-19 Confirmed Case Rate per 100,000 persons by County

COVID-19 Confirmed Case Rate per 100,000 persons *Based on patient county of residence when known

Not Presented
 26.3 - 84.1
 84.2 - 142
 142.1 - 200
 200 - 2286

Rate indicates the number of cases among Georgia residents per 100,000 population using 2019 Census data projections as the denominator. Rates for counties with fewer than 5 cases may not be accurate and are not presented in this report.

COVID-19 cases positive counties: 157

Hospitalized: 4,433

*Based on patient county of residence when known

Situation Report # 043

Hot Topic

Department of Public Health Antibody Testing

The Georgia Department of Public Health, Fulton County Board of Health and DeKalb County Board of Health are working with the CDC to learn more about the spread of COVID-19 in the community. From April 28 through May 4, teams will be visiting randomly selected homes in DeKalb and Fulton to ask residents questions about their health and collect blood samples for an antibody test. The antibody test can tell us whether a person might have had a past infection with the virus that causes COVID-19. The antibody test is not meant to diagnose whether a person has COVID-19 now. **Participation is voluntary.** For more information, visit <https://dph.georgia.gov/covid-19-antibody-testing>

Fatality Statistics

Median age: **75**

Age Range: **22-101 years**

Sex: Male **515** Female **426** (Unknown: 1)
