Department of Public Health Antibody Testing

The Georgia Department of Public Health, Fulton County Board of Health and DeKalb County Board of Health are working with the CDC to learn more about the spread of COVID-19 in the community.

From April 28 through May 4, teams will be visiting randomly selected homes in DeKalb and Fulton to ask residents questions about their health and collect blood samples for an antibody test. The antibody test can tell us whether a person might have had a past infection with the virus that causes COVID-19. The antibody test is not meant to diagnose whether a person has COVID-19 now. **Participation is voluntary.** For more information, visit <https://dph.georgia.gov/covid-19-antibody-testing>.

COVID-19 Confirmed Case Rate per 100,000 persons by County

COVID-19 cases positive counties: 157

Hospitalized: 5,129

*Based on patient county of residence when known

Fatality Statistics

Median age: 73

Age Range: 22-106 years

Sex: Male 592 Female 517 (2 unknown)
